1 Hierarchical pattern mapping

Cyril Soler, Marie-Paule Cani, Alexis Angelidis
July 2002 **ACM Transactions on Graphics (TOG) , Proceedings of the 29th annual conference on Computer graphics and interactive techniques SIGGRAPH '02**, Volume 21 Issue 3
Publisher: ACM Press

Full text available: pdf(5.28 MB) Additional Information: full citation, abstract, references, citings, index terms

We present a multi-scale algorithm for mapping a texture defined by an input image onto an arbitrary surface. It avoids the generation and storage of a new, specific texture. The idea is to progressively cover the surface by texture patches of various sizes and shapes, selected from a single input image. The process starts with large patches. A mapping that minimizes the texture fitting error with already textured neighbouring patches is selected. When this error is above a threshold, the patch ...

2 Environmental acquisition: a new inheritance-like abstraction mechanism

Joseph Gil, David H. Lorenz
October 1996 **ACM SIGPLAN Notices , Proceedings of the 11th ACM SIGPLAN conference on Object-oriented programming, systems, languages, and applications OOPSLA '96**, Volume 31 Issue 10
Publisher: ACM Press

Full text available: pdf(2.40 MB) Additional Information: full citation, abstract, references, citings, index terms

The class of an object is not necessarily the only determiner of its runtime behaviour. Often it is necessary to have an object behave differently depending upon the other objects to which it is connected. However, as it currently stands, object-oriented programming provides no support for this concept, and little recognition of its role in common, practical programming situations. This paper investigates a new programming paradigm, *environmental acquisition* in the context of *object ag ...*

3 "We Release Them Little by Little": Maturation and Gender Identity as Seen in the Use of Mobile Telephony

Rich Ling

January 2001 **Personal and Ubiquitous Computing**, Volume 5 Issue 2
Publisher: Springer-Verlag
Full text available: pdf(155.49 KB) Additional Information: full citation, abstract, citings, index terms

This paper examines the social meaning behind the adoption of mobile telephones by teenagers in Norway. Through this adoption process one can see the way in which youths are developing their adult identity as well as their gendered identity. The primary database used in this analysis is from two telephone questionnaires of Norwegian youth aged 13–20 carried out in October and December 1998. A total of 2007 interviews are included. The survey instrument covered teenagers' ownership of ...

The class of an object is not necessarily the only determiner of its runtime behaviour. Often it is necessary to have an object behave differently depending upon the other objects to which it is connected. However, as it currently stands, object-oriented programming provides no support for this concept, and little recognition of its role in common, practical programming situations. This paper investigates a new programming paradigm, *environmental acquisition* in the context of *object ag* ...

3 "We Release Them Little by Little": Maturation and Gender Identity as Seen in the Use of Mobile Telephony

This paper examines the social meaning behind the adoption of mobile telephones by teenagers in Norway. Through this adoption process one can see the way in which youths are developing their adult identity as well as their gendered identity. The primary database used in this analysis is from two telephone questionnaires of Norwegian youth aged 13–20 carried out in October and December 1998. A total of 2007 interviews are included. The survey instrument covered teenagers' ownership of ...
